Research Snapshots

Building an inclusive, healthier tomorrow globally

**Why I'm a Health Scientist:
Dr. Shahirose Sadrudin
Premji**

The [Sally Smith Chair](#) in the School of Nursing shares her inspirations, dream research collaborator and the importance of global maternal and newborn health research.

[Read the interview »](#)

**Understanding the
impact of private nurse
agencies across Canada**

Dr. Joan Almost's study examines healthcare organizations utilization of agency nurses and the implications for patients, system outcomes, and the nursing profession.

[Full Announcement »](#)

**Examining opioid use
disorder treatment in
primary care**

PhD student and 3MT finalist Martha Whitfield is researching how enhanced nurse practitioner capacity can advance primary care for opioid use disorder, improving treatment and outcomes.

EXPLORE

In the Spotlight

From media interviews to expert presentations, our faculty and learners stole the research spotlight this year

Recognizing early-career research excellence

Dr. Alyson Mahar recognized with Queen's highest internal research award for her field-leading research and innovation. Dr. Mahar's interdisciplinary team is working towards addressing inequitable health care delivery by advancing understudied areas of cancer care, mental health, and the defence and public safety sectors.

Doctoral student top five in SSHRC Storytellers competition

PhDHQ student Madison Robertson is examining the mental health impact of spousal separation for her research project: "Till Death Do Us Part: Spousal Separation in Long-Term Care."

[Madison's research story »](#)

Medicine or food?

Nurse practitioner and recent Queen's School of Nursing PhD graduate Dr. Paulina Bleah centers her research on diabetes around the lived experience of people living with diabetes in Liberia.

Food insecurity and healthcare neglect emerge as their two major challenges.
